STANDARDS

NAME	MEANING	ЗНАЧЕННЯ
EN 340:2004	The standard defines requirements and test methods for garments and clothing combinations (overalls or two-part suits) designed to protect the wearer in a cold environment (characterised by a combination of humidity, wind and an air temperature lower than -5 °C). The standard does not contain any specific requirements for head, hand or foot protection.	Загальні обов'язкові вимоги до захисного одягу щодо: маркування, що ідентифікує виробника, маркування, що ідентифікує виріб, позначення розміру або діапазону розмірів, номера конкретного стандарту, піктограми. Може включати максимальну кількість циклів очищення.
EN 342	The standard defines requirements and test methods for garments and clothing combinations (overalls or two-part suits) designed to protect the wearer in a cold environment (characterised by a combination of humidity, wind and an air temperature lower than -5 °C). The standard does not contain any specific requirements for head, hand or foot protection.	Стандарт визначає вимоги та методи випробувань для одягу та комплектів одягу (комбінезонів або костюмів із двох частин), призначених для захисту користувача від холодного середовища (яке характеризується поєднанням вологості, вітру та температури повітря нижче -5 °C). Стандарт не містить жодних специфічних вимог щодо захисту голови, рук або ніг.
EN 343 (Class 3-1)	The standard defines test methods and requirements for fabrics and seams of clothing designed to protect against bad weather: precipitation (rain and snow), fog, humidity, wind, and temperatures up to -5 °C. Water resistant (level 3 - highest) and vapor permeability (level 1 - not classified as breathable).	Стандарт визначає методи випробувань та вимоги до тканин і швів одягу, призначеного для захисту від негоди: атмосферних опадів (дощу та снігу), туману, вологості, вітру та температур до -5 °C. Водостійкість (рівень 3 – найвищий) та паропроникність (рівень 1 – не класифікується як повітропроникний/дихаючий).

STANDARDS

NAME	MEANING	ЗНАЧЕННЯ
EN 13688	General mandatory requirements of protective clothing in terms of: mark identifying the manufacturer, product identifying mark, size or size range designation, specific standard number, pictogram. May include a maximum number of cleaning cycles.	Стандарт визначає загальні обов'язкові вимоги до захисного одягу щодо: ергономіки, комфорту, безпеки, стійкості кольору, зміни розмірів (усадки) внаслідок очищення (не більше 3%). Одяг, сертифікований відповідно до цього стандарту, маркується знаком CE.
OEKO-TEX® Standard 100	OEKO-TEX® Standard 100 certifies that every component of this garment is free from harmful substances and safe for human health, meeting strict international safety standards.	OEKO-TEX® Standard 100 підтверджує, що цей виріб не містить шкідливих речовин та є повністю безпечним для здоров'я людини, відповідаючи суворим міжнародним стандартам.
EN 343	The standard for protective clothing that outlines a minimum level of protection against wet weather, taking into account the construction of the entire garment in addition to the fabrics.	The standard for protective clothing that outlines a minimum level of protection against wet weather, taking into account the construction of the entire garment in addition to the fabrics.
EN 352-1:1993, IDT	The standard defines test methods and requirements for personal hearing protection. Part 1 - noise protection headphones.	Цей стандарт визначає методи випробувань та вимоги до засобів індивідуального захисту органів слуху. Частина 1 — навушники для захисту від шуму.
EN 352-1-2002	The standard defines test methods and requirements for personal hearing protection.	Цей стандарт визначає методи випробувань та вимоги до засобів індивідуального захисту органів слуху.

STANDARDS

NAME	MEANING	ЗНАЧЕННЯ
EN 166	This standard defines requirements for personal eye protection.	Цей стандарт визначає вимоги до засобів індивідуального захисту очей.
EN 172	EN 172 is a special standard for personal eye protection that describes the required physical properties of filters used to reduce sun glare in industrial use. These properties include, for example, mechanical and optical characteristics and requirements for sun glare filters.	EN 172 — це спеціальний стандарт для засобів індивідуального захисту очей, який описує необхідні фізичні властивості фільтрів, що використовуються для зменшення сонячних відблисків під час промислового використання. Ці властивості включають, наприклад, механічні та оптичні характеристики, а також вимоги до фільтрів від сонячних відблисків.
EN 170	This standard defines the protection levels and transmittance requirements for ultraviolet filters.	Цей стандарт визначає рівні захисту та вимоги до пропускання світла для ультрафіолетових фільтрів.
